FEATURE

New design with No springs helps to overcome challenges with conventional pulse tools.

- More powerful
- Minimizes temperature increase
- No need to warm up before use

Improved Durability

Low oil pressure inside the pulse unit reduces the pressure against sealing, which minimizes oil leakage.

Newly designed Auto-Relief (PAT.P) is not affected by oil degradation.

Upsized LED lamp enables operators to judge OK/NOK easily in any posture.

Pairing parameter is selectable from 3 types;

1. Manual Pairing by dip switches
2. Pairing through software
3. Wireless pairing

Fastening parameters are memorized in UCC-100Z coordinator. Quick tool change only by pairing!
